Notes:

- The maximum eligible costs shown above are multiplied by the grant rate available e.g. an applicant qualifying for a 50% grant rate will be offered 50% of the maximum eligible costs above.
- Subsistence costs are pre-defined per course in line with public service rates:
  - Those living within 8km of the training location will not be entitled to subsistence.
  - Those living between 8km and 100km from the training location will be entitled to the day rate.
  - Those living more than 100km from the training location will be entitled to the overnight rate.
- Subsistence costs do not apply to courses provided through BIM's Coastal Training Units (CTUs) since these mobile units travel to coastal locations to provide training close to students home or work.
- SSCF refers to Small Scale Coastal Fishers. Owners of SSCF vessels receive a preferential grant rate for courses deemed relevant for SSCF vessels.
